

Woolpert to Realign Shakertown Road, Eliminate Intersection with U.S. 35

The Beavercreek thoroughfare will be redirected to Factory Road, directly across from Yellow Brick Road.

BEAVERCREEK, Ohio ([PRWEB](#)) May 11, 2016 -- [Woolpert](#) has been contracted by the city of Beavercreek to realign Shakertown Road in Beavercreek and eliminate its intersection with U.S. 35. The revised Shakertown will connect to Factory Road to the east, in a four-way intersection with Yellow Brick Road, south of U.S. 35.

This project is part of the [Ohio Department of Transportation](#)'s (ODOT) ongoing efforts to improve the safety of U.S. 35 through Beavercreek, primarily between Factory and Orchard Lane.

ODOT is moving toward more interchanges and fewer intersections along this section, and has been seeking public input.

Nathan Fischer, Woolpert project manager, said the intersection of Shakertown and U.S. 35 is a dangerous one, with 32 reported crashes at that site in the last three years and 20 percent of those incurring injury.

“We’re going to fix a safety concern that’s been in the area for a while,” Fischer said. “It also affects us on a personal level, since the intersection is 4 miles from our headquarters. A lot of our staff drives through the intersection.”

This project also will involve a slight realignment of Alpha-Bellbrook Road, which currently is part of an offset intersection with Yellow Brick. Alpha-Bellbrook will be diverted into a T-intersection with Shakertown, west of Factory.

The project is in the design phase, and likely will start construction in 2020.

About Woolpert

Woolpert is a national architecture, engineering and geospatial (AEG) firm that delivers value to clients by strategically blending engineering excellence with leading-edge technology and geospatial applications. With a dynamic R&D department, Woolpert works with inventive business partners like Google; operates a fleet of planes, sensors and unmanned aerial systems (UAS); and continually pushes industry boundaries by working with advanced water technologies, asset management, Building Information Modeling (BIM) and sustainable design. Woolpert’s mission is to help its clients progress—and become more progressive. For over 100 years and with 24 offices across the United States, Woolpert serves the needs of federal, state and local governments; private and public companies and universities; energy and transportation departments; and the United States Armed Forces.
