Press Release

Roadway Advisory Due To Heavy Rain Fall
Traffic Alert

Las Cruces: The New Mexico Department of Transportation (NMDOT) District One office has maintenance personnel out monitoring roadways and clearing various routes from the overnight rain. Currently crews are out on the Frontage Roads (FR1037 and 1035) between Las Cruces and Vado removing debris and mud slides, along with sections of Bataan Memorial east and westbound.

The NMDOT would like to remind motorists to use extreme caution when traveling wet roads as they become very slick, and to avoid routes with standing water as they may need to seek an alternate route.

The Las Cruces Police Department recommends the following safety tips:

- Slow down. Allow for more travel time when driving in wet weather.
- When coming to a stop, begin slowing down sooner and apply gentle brake pressure. Avoid slamming on brakes.
- Allow for greater distance between vehicles. Normal driving conditions recommend travelling at least two seconds behind vehicles. During wet weather it is recommended to increase that distance.
- Give larger vehicles, like trucks and buses, more room for stops and turns.
- Avoid making sudden turns or lane changes.
- Drive around puddles as sitting water may be deeper than what it appears.
- Never attempt to drive through flooded arroyos or running water. Even when driving a large vehicle, like a truck or SUV, fast-moving water can easily overcome it.
- Drive with headlights on and be alert to surrounding traffic and changing weather conditions.
- If rain is too heavy or streets are flooded, pull over to a safe distance from the roadway – in a parking lot or away from traffic – until conditions improve.
- Keep your vehicle well-maintained. Periodically check that brakes, tires and windshield wipers are in good working condition.

The NMDOT will post traffic updates as they are reported on their road advisory page www.nmroads.com which can be retrieved by calling 511 or 1-800-432-4269.
