

The Traffic Solution

([PRWEB](#)) November 7, 1999 -- The Traffic Group, Inc., established in 1985, is a leading Traffic Engineering and Transportation Planning specialty firm headquartered in the State of Maryland. We are proud that our team includes two of the nation's 177 certified Professional Traffic Operations Engineers (P.T.O.E.) and provides professional consultation services throughout the United States. These services include Traffic Engineering and Transportation Planning Studies; Traffic Engineering Design; Data Collection Services; and Parking Lot and Garage Services. Any one or all of these services may be utilized throughout various phases of a project. In essence, The Traffic Group provides consultation on all aspects of any project that deals with the movement of vehicles and pedestrians to, from and within the confines of a specified site, or through a defined area. As our project list, included in this web page, demonstrates, we have extensive experience in the traffic and transportation engineering industry.

All of the technical members of our staff are highly qualified professionals in the Traffic Engineering and Transportation Planning field. Combined, our staff brings more than two hundred years of experience to each project. This experience along with the employees' high level of motivation and demand for excellence is what has maintained the Traffic Group's status as a leader in our field since 1985.

The Traffic Group is committed to continuing education for our professionals, which allows us to remain up-to-date on new or developing standards and regulations that affect our industry. This dedication to excellence allows us to continue to provide the high quality service our clients expect and deserve.

The Traffic Group is proud to provide you with a representative list of clients contained elsewhere in our web site. They cover a whole range of professions such as architects, engineers, attorneys, developers as well as government organizations. Over fifty (50%) of them are repeat clients. While keeping a high client repeat rate, our quality service has also attracted new clients nation wide every year. We are very proud of this successful client relationship which is a credit to our skilled and professional staff.

The Traffic Group takes pride in its quality control and assurance program. From a project's inception, the Project Manager immediately attends to the specifics and follows the project through to successful completion. All work is supervised by a Professional Engineer and the President of The Traffic Group, Wes Guckert.
