Press Release

Crack-Sealing Work Begins in Chaves County

Roswell – The New Mexico Department of Transportation (NMDOT) has started a project to crack seal pavement on NM 2 and US 380 in Chaves County.

The contractor began this week on NM 2, and once complete, will begin work on US 380.

Drivers may encounter flaggers where work is being performed, as well as brief, intermittent lane closures. Work will take place Monday through Friday from 7:00 a.m. to 5:00 p.m. Work is expected to be complete by the end of November, weather permitting.

Crack-sealing preserves the life of a roadway by applying sealing material directly into the cracks of the pavement to prevent moisture damage. NMDOT District Two typically schedules this type of work during the winter months.

For up-to-date road construction information throughout the state, visit www.nmroads.com or call 511.
