Traffic Advisory

NM 599 & Jaguar Drive Interchange

Santa Fe - Commercial Center @ 599 (CC@599) continues roadway work as part of the New Mexico Department of Transportation (NMDOT) access permit granted to CC@599 for a new access to NM 599 at Jaguar Drive located in southern Santa Fe. A diamond interchange is being constructed by CC@599 as part of the requirements of an access permit issued by the NMDOT for access to NM 599 for new development located along NM 599.

Starting Tuesday, April 14 through May 15, the NM 599 northbound and southbound lanes will be reduced to one lane in each direction. The contractor will be building the center pier for the new interchange bridge over NM 599. The lane closure will remain in effect until the bridge pier work is completed. There is a 12' lane width restriction.

The new interchange will result in an efficient connection for multimodal facilities in the southern part of Santa Fe that include a multi-use trail, the Rail Runner Station at NM 599 and the Santa Fe Airport.

Drivers are urged to proceed with caution through the work zone, observe traffic control signs and reduce speed to the posted limit. Updates on this project will be posted on the New Mexico Department of Transportation's road advisory website www.nmroads.com
