

## **InventHelp Inventor Develops Improved Nav/comm System for Motorists (OCM-999)**

*A leading invention submission firm, InventHelp is submitting the NPS-NAVIGATION PRERECORDED SYSTEM to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) January 04, 2016 -- "I thought that it would be more convenient for motorists if businesses could advertise directly to them and share news about sales or other events," said an inventor from Whittier, Calif. "I envisioned a more direct means of communications that utilizes the vehicle's navigation system."

He developed the NPS-NAVIGATION PRERECORDED SYSTEM to provide an improved way for businesses to advertise directly to nearby motorists. This ensures that the user has the latest data on sales, deals, promotions and other events. It makes it easier to locate a nearby restaurant, grocery store, amusement park or other locale. The system boosts sales and makes motorists happier. It is designed to reduce stress when going on road trips. Furthermore, the device is ideal for use when driving in unfamiliar areas.

The original design was submitted to the Orange County office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-OCM-999, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
