

## **Child Safety Accessory Invented by InventHelp Clients (ORD-2188)**

*One of America's largest invention companies, InventHelp is submitting the SAFETY STRIP INDICATOR to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) January 04, 2016 -- Two inventors, from Chuluota, Fla., thought there needed to be an improved way to determine if a child's car seat is a safe and comfortable temperature, so they invented the patent-pending SAFETY STRIP INDICATOR.

The SAFETY STRIP INDICATOR provides an effective way to determine if a child's car seat is a safe temperature. In doing so, it could help to prevent overheating and deaths. As a result, it enhances safety and comfort and it provides added peace of mind. The invention features a practical design that is convenient and easy to use so it is ideal for parents of infants and young children. Additionally, the SAFETY STRIP INDICATOR is producible in design variations.

The inventors described the invention design. "Our design could help to visually determine if the temperature inside a vehicle is safe for children and infants, thereby preventing deaths."

The original design was submitted to the Orlando office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-ORD-2188, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
