

## **InventHelp Inventor Designs RIM PROTECTOR (TOR-9460)**

*One of America's largest invention companies, InventHelp is submitting the RIM PROTECTOR to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) January 06, 2016 -- An inventor, from London, Ontario, Canada, thought there needed to be an easy way to prevent tire coating and cleaning chemicals from spraying onto rims and hubcaps after rims were polished, so he invented the patent-pending RIM PROTECTOR.

The RIM PROTECTOR provides an effective way to protect a vehicle's rims and hubcaps during cleaning of tires. In doing so, it helps to prevent chemicals from accumulating on rims and hubcaps. It also saves time and energy. The invention features a durable design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the RIM PROTECTOR is producible in design variations and a prototype is available.

The inventor described the invention design. "My design protects a vehicle's freshly cleaned and polished rims and hubcaps from tire-spray chemicals during cleanings."

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-TOR-9460, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
