

## **InventHelp Inventor Develops Device to Screen Off Accident Sites (CCT-2014)**

*One of America's leading inventor service companies, InventHelp is submitting the NON-VISIBLE VICTIM SCREEN to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) December 23, 2015 -- "When an accident or incident occurs on a major roadway, it can back up traffic for miles," said an inventor from Dayton, Ohio. "What makes it even worse is all of the rubbernecks who slow down, not keeping their eyes on the road, to survey the carnage. I came up with this idea as a way to shield the scene from view."

He developed the NON-VISIBLE VICTIM SCREEN to block the scene of an accident from view. The accessory keeps other motorists from slowing down to survey the scene. This avoids secondary traffic congestion caused by rubbernecks. It may help to prevent other collisions from occurring in the vicinity as well. The unit is designed to enable emergency crews to work without being disturbed. In addition, the screen is easy to set up and take down.

The original design was submitted to the Cincinnati office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-CCT-2014, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
