

Inventor and InventHelp Client Develops Trailer Accessory (DLL-2936)

InventHelp, one of America's leading invention submission firms, is submitting the POWER LEG to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) December 27, 2015 -- "I am a transport refrigeration mechanic, and I needed a quicker, safer, easier way to lift and lower the legs on trailers," said an inventor from Midlothian, Texas. "I came up with this idea in order to make the task less difficult, time-consuming and dangerous."

He developed the POWER LEG to offer a quicker, easier way to lift and lower the legs on a trailer. The device eliminates the need to perform the task manually. It saves time, effort and energy. The system also reduces the risk of injury, which is designed to enhance personal safety. Additionally, the invention is easy to use.

The original design was submitted to the Dallas office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-DLL-2936, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
