

Inventor and InventHelp Client Develops BAC Tester (JMC-1795)

InventHelp, based in Pittsburgh, Pa., is submitting the DRIVERS EDGE to companies in the hopes of their good faith review.

PITTSBURGH, PA ([PRWEB](#)) December 29, 2015 -- "Many people choose to drink and drive simply because their are unaware of their actual blood alcohol level," said an inventor from Tunica, Miss. "I thought that there should be a device that lets people test their own levels so that they will not drive drunk."

He developed the DRIVERS EDGE to offer a way for an individual to test blood alcohol content. This enables the user to determine if he or she is able to drive safely or not. The device helps the user make more informed decisions. The accessory reduces the risk of drinking and driving, which is designed to enhance roadway safety. Furthermore, it is easy to use.

The original design was submitted to the National Sales Office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-JMC-1795, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
