*Monster Transmission & Performance announced that they will be giving away a transmission in honor of International Shift Awareness Month (I.S.A.M.).*

Brooksville, FL ([PRWEB](#)) January 24, 2016 -- This is the third year of Monster Transmission's participation in honoring ISAM but the first transmission giveaway in observance of the celebration. In addition to the giveaway, Monster will show their support with the production of several videos throughout the month, as they have done in previous years.

Contest entry requires the participant to fill out a simple form on the Monster Transmission website and make a short video depicting why the contestant should be selected. The contest will end -and the winner will be selected- on Friday, April 1, 2016.

International Shift Awareness Month:

ISAM is an annual worldwide observance of one of the most important components of the automobile. It is intently celebrated at the beginning month of each year as an immediate reminder to take proper care of the most neglected part of your drivetrain.

ISAM was first conceived in remembrance of the automatic transmission that was invented 93 years ago in 1921. This invention was a huge feat that freed the driver from having to shift the gearbox manually and deserved to be celebrated. It was so well received that it was later decided to include all shift types to be honored and glorified.

In tribute to all transmissions ranging from mild to wild, automatic to manual, Monster Transmission is demonstrating its appreciation and support to honor International Shift Awareness Month.
