

US Fleet Tracking Provides Fleet Managers With Tips To Optimize Usage Of The GPS Tracker Mobile App

US Fleet Tracking talks about ways to get information quickly while viewing with the GPS tracker mobile screen.

Oklahoma City, Oklahoma ([PRWEB](#)) January 27, 2016 -- Being a fleet manager means being busy and doing far more than just managing other people. Fleet managers have the task of monitoring company assets and equipment, too. A lot of fleet managers have found that GPS tracker devices make their daily tasks much more efficient than they were before. The [GPS tracker system](#) is simple to learn so that fleet teams can get on the road to success quickly. With a few clicks on a mobile phone, managers can see all of their devices and know quite a bit about what's going on in the field. Today, US Fleet Tracking provides fleet managers with tips to optimize their usage of the GPS tracker mobile application (app).

Step 1.) Log-In to the system and there is an option to save log-in information after initially signing in so as to make it quicker for the future.

Step 2.) After logging into the system it's pretty easy to navigate around by "clicking" or tapping on your smartphone's screen. At the bottom of the screen users will see a spot where they can click on devices, so they should click it!

Step 3.) A screen opens up which gives the user some very basic information right at a glance. The list of devices have the letter "i" next to them which are color coded for a one-second recognition of what is going on. The clear letter "i" means that a particular vehicle is stopped or not being used. Yellow indicates that a vehicles is in idle and by clicking into that device more information can be seen such as; how long that vehicle has been idle and the address where they are located. Devices in the list with green next to them means that those vehicles are on the move and clicking on a particular vehicle will give information such as how fast that vehicle is moving.

It's as easy as 1, 2, 3! In just a few clicks into the system managers are able to obtain automatic visuals on all their drivers in the field and know exactly what each driver is doing. Furthermore, managers utilizing [GPS tracker](#) devices in their company vehicles have the capability to complete a quick check-up on their fleet drivers in a matter of seconds when they are using the mobile app.
