

Pinnacle Auto Glass Launched in Phoenix, AZ

New mobile auto glass repair and windshield replacement company launches with a focus on customer convenience and doing things right.

Phoenix, Arizona ([PRWEB](#)) January 25, 2016 -- [Pinnacle Auto Glass](#) is excited to announce that we will be launching February 1, 2016 and will provide a complete range of auto glass services to customers in the greater Phoenix, Arizona metropolitan area, including all major cities such as [Mesa](#), [Chandler](#), and [Scottsdale](#). The founders' primary goal in starting Pinnacle is to make the auto glass service process as fast and convenient as possible for our customers so we can build a long-term locally owned business through a strong foundation of customer referrals.

While some glass companies require their customers to come to a particular location for any service work, all Pinnacle technicians are mobile and can come repair or replace auto glass anywhere in Maricopa County. This eliminates annoying trips to service locations and even more annoying waiting in waiting rooms while the work is performed. Most of our windshield and auto glass work will actually be performed either at customer homes or while they are at work, whichever is most convenient.

All appointments will be confirmed the day they are scheduled by one of our friendly customer service representatives, and the service technician will call each customer when they are on the way to make sure there are no scheduling surprises and wait times are as fast as possible. We will even offer same day service on a limited basis to popular locations in the Phoenix area. Same day service will be first come, first served, so customers are encouraged to call as soon as they decide to schedule an appointment to give them the best chance for same day service in their area.

Pinnacle is currently assembling an inventory of auto glass for the majority of modern personal and light commercial vehicles. Our goal is to be able to provide glass repair or replacement for all personal and commercial vehicles from 1980 to present day, including cars, trucks and SUVs from all major auto manufacturers. We will also either stock or be able to get auto glass for popular vehicles from the 1960s and 1970s, including both classic cars and common light commercial trucks.

We look forward to serving Valley of the Sun customers for years to come with high quality auto glass repair and windshield services.
