

Inventor and InventHelp Client Designs Vehicle Safety Device (AUP-595)

One of America's leading inventor companies, InventHelp is submitting the CAR TUNE REMINDERS to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) December 22, 2015 -- An inventor, from Corpus Christi, Texas, thought there needed to be an effective way to remind parents to remove a small child from a parked vehicle, so he invented the patent-pending CAR TUNE REMINDERS.

The CAR TUNE REMINDERS helps to prevent a small child, senior adult and pets from being left behind in a parked vehicle. In doing so, it enhances safety and it could help to prevent heat-related injuries. As a result, it provides added peace of mind. The invention features an adaptable design that is easy to install and use so it is ideal for parents with small children. Additionally, the CAR TUNE REMINDERS is producible in design variations. It can be used all year, not just the summertime.

The inventor described the invention design. "My design helps to prevent children, senior adults and pets from being accidentally left behind."

The original design was submitted to the Austin office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-AUP-595, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
