

## **InventHelp Client's Device Helps Save Children from Being Forgotten in Vehicles (AVZ-1340)**

*InventHelp is working to submit this idea, the BABY REMINDER, to appropriate companies for their consideration and potential review.*

PITTSBURGH, PA ([PRWEB](#)) December 22, 2015 -- An inventor from Phyllis, Ky., is concerned about children dying in unattended vehicles. "It's horrible that children die due to being forgotten in vehicles," he said, "so I decided that there needs to be a reliable way to help prevent this from happening."

Easy to use and producible in design variations, the BABY REMINDER is a device that prevents a parent or guardian from leaving a child behind in a vehicle. It helps ensure that the child is removed from the vehicle, which avoids tragic fatalities. The device is ideal for all parents and guardians of children.

The original design was submitted to the National Sales office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-AVZ-1340, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
