

World Patent Marketing Invention Team Launches Innovative Safety Invention as Lawmakers Push for Double Penalties for Texting While Driving

World Patent Marketing Reviews A New Safety Invention. Will StopText Be the Next World Patent Marketing Low Cost Success Story?

New York, NY ([PRWEB](#)) February 03, 2016 -- [World Patent Marketing](#), a vertically integrated manufacturer and engineer of patented products, announces the StopText, a safety invention which prevents people from accessing their mobile phones unnecessarily while driving.

"Texting while driving is six times more likely to result in accidents and injury compared to drunk driving," says Scott Cooper, CEO and Creative Director of World Patent Marketing. "According to the National Safety Council, 1.6 million car crashes every year were caused by a driver using his mobile phone while driving. What's alarming is that at any given moment, 660,000 drivers are using their mobile phones or electronic devices while behind the wheel. That's 660,000 accidents or more waiting to happen."

"People these days are always seen using their smart phones while accomplishing other tasks," says Jerry Shapiro, Director of Manufacturing and [World Patent Marketing Inventions](#). "The problem with this is that even while driving, they continue on to browse through their messages and even leave posts on their social media accounts. StopText is a safety invention which prevents people from using their mobile phones while driving thus preventing accidents."

StopText is a safety invention specially designed to address the increasing problem of vehicle related accidents caused by people using their phones while driving. It comes in the form of an electronic chip which can be embedded inside a mobile device or a vehicle. What this special chip does is disable the mobile phone of a driver while on the road. Text messages and phone calls will only be received once the vehicle is in full stop or below the speed limit allocated. Emergency calls and messages are still received on time and this allows drivers to stop driving and answer the call or text message.

"StopText is an ideal solution to preventing if not eliminating road accidents caused by mobile phone usage," says inventor Yer Y. "This safety invention is designed to prevent people from gaining access to their mobile phones while driving. In this manner, their full concentration is on the road and they are more aware of their surroundings."

Dorothy Smith, a sales agent and car owner from Los Angeles, CA, has this to say about StopText: "Being on the road daily for work, I am constantly worried about irresponsible drivers who cannot seem to stop using their phones even while driving. Thanks to StopText, people are now made to stop using their phones and concentrate on their driving."

StopText is a safety invention which will prevent people from unnecessarily using their phones while driving, allow them to drive more carefully on the road and prevent accidents from occurring.

ABOUT WORLD PATENT MARKETING

World Patent Marketing is an innovation incubator and manufacturer of patented products for inventors and entrepreneurs. The company is broken into eight operating divisions: Research, Patents, Prototyping,

Manufacturing, Retail, Web & Apps, Social Media and Capital Ventures.

As a leader in patent invention services, World Patent Marketing is by your side every step of the way, utilizing our capital and experience to protect, prepare, and manufacture your new product idea and get it out to the market. Get a patent with World Patent Marketing and the company will send representatives to trade shows every month in order to further advocate for its clients. It is just part of the [world patent marketing cost](#) of doing business.

[World Patent Marketing Success Stories](#) are made possible because of its A+ rating with the Better Business Bureau and its five star ratings from consumer review sites including: Consumer Affairs, Google, Trustpilot, Customer Lobby, Reseller Ratings, Yelp and My3Cents.
