

Vehicle Inspection Systems to Showcase Work Truck Maintenance Equipment at the 2016 NTEA Work Truck Show

Vehicle Inspection Systems' team will be attending and exhibiting at the 2016 NTEA Work Truck Show exhibiting the safety and maintenance tools and equipment to benefit work truck fleets, operators, and repair and maintenance facilities.

Orlando, FL ([PRWEB](#)) February 16, 2016 -- The Vehicle Inspection Systems (VIS) sales and service team is on the road again! We're heading back to Indianapolis for the second time this year to exhibit at the 2016 NTEA Work Truck Show. From March 2-4, VIS will be located at booth #508 of the Indiana Convention Center throughout the span of the show.

VIS will be showcasing the VIS-Polish, VIS-Shine, Squirrel: Wheel Safety Device, and will introduce the HD Powersmoke at the show. The VIS-Polish machine refurbishes and polishes aluminum truck wheels to a mirror-like finish, and the VIS-Shine is a portable on-truck wheel polisher. The HD Powersmoke is a new product for VIS that reliably detects any high pressure leak at its exact location saving heavy duty work truck operators and work truck fleets valuable maintenance time.

Vice President of VIS, Mark Keegans, will be setting up meetings and VIS-Polish demos at the booth daily at the Work Truck Show. Keegans says, "Each year we start the new year with a full schedule of trade shows and events. This busy show schedule allows us to keep up the momentum throughout the year and gives us the opportunity to connect and reconnect with current and future customers."

The annual NTEA Work Truck Show is designed to provide educational sessions followed by a large floor plan of new products that teach customers about the newest products. Stop by booth #508 during the show to see the VIS-Polish and VIS-Shine in action and see how they can help boost productivity and efficiency for your business. For more information on VIS and all its products, visit www.vispolish.com.
