

## **New at Summit Racing Equipment: Viking Air Tools**

*Viking Air Tools are the go-to equipment choice for professionals and hobbyists alike. They're rugged and durable enough for the rigors of day-to-day shop use and are affordable too.*

Tallmadge, OH ([PRWEB](#)) February 19, 2016 -- [Viking Air Tools](#) are the go-to equipment choice for professionals and hobbyists alike. They're rugged and durable enough for the rigors of day-to-day shop use and are affordable too.

Viking straight line sanders are effective on body putty, wood, metal, and fiberglass. The Dual-Piston Straight Line Sander works well for removing large amounts of excess material quickly and efficiently. Viking's single-piston MiniVike is perfect for sanding those hard-to-reach areas. The MiniVike's smaller size also helps ward off fatigue on those long-haul jobs. Both the Dual-Piston and MiniVike Straight Line Sanders are made in the USA.

Thanks to its direct-drive design, Viking's 1/4" Angle Gearless Die Grinder provides long-lasting durability and performance. That also means no bevel or pinion gears to maintain. It has a 105 degree angle head and is housed in a one-piece casting for extended durability. An ergonomic design mitigates hand strain.

The lightweight, ultra-slim design of Viking's Reciprocating Air Saw and File makes it a must-have tool for getting in tight spaces. The saw uses a high performance cutting motor that delivers an impressive 5,000 cutting strokes per minute. A built-in regulator offers precise speed control and the saw's positive blade retention mechanism means less need to change blades. It comes with five files and two cutting blades.

Viking's 3/8" Air Impact Wrench will make short work of corroded and over-tightened bolts. It features a twin-hammer impact mechanism to loosen even the most stubborn fastener. It has adjustable forward/reverse torque settings too, which makes this a versatile tool for multiple applications. A handy lever throttle gives operators intuitive control over the wrench's action.

Summit Racing carries other Viking air tools plus a wide range of air compressors, air hoses, fittings, and air tool storage racks.
