

## **New at Summit Racing Equipment: Eibach Pro-Truck Shocks**

*Summit Racing now carries Eibach Pro-Truck Shocks. Designed using the same shock technology found in SCORE, CORR, Dakar and WRC racing, Pro-Truck shocks feature custom performance valving to improve handling and stability without sacrificing ride quality.*

Tallmadge, OH ([PRWEB](#)) March 01, 2016 -- Summit Racing now carries [Eibach Pro-Truck Shocks](#). Designed using the same shock technology found in SCORE, CORR, Dakar and WRC racing, Pro-Truck shocks feature custom performance valving to improve handling and stability without sacrificing ride quality.

Pro-Truck shocks are a gas-charged monotube design with beefy 46mm pistons and nitro-coated rods. Enthusiasts can choose the shock that best fits how they use their vehicles:

- Pro-Truck standard shocks are the ideal replacement for the factory shocks on a stock pickup or SUV at stock ride height
- Pro-Truck Sport shocks feature more off-road capable valving with a focus on ride quality. They're designed for stock height trucks or vehicles with up to three inches of lift
- Pro-Truck Sport Leveling shocks are designed for trucks with front coil-over suspensions. They allow the user to lift the front of the vehicle up to 2.5 inches for extra tire and ground clearance, without reducing wheel travel like spring spacer-type lifts can

Pro-Truck Shocks are made in the USA and dyno tested for quality and performance. Summit Racing offers Pro-Truck shocks to fit many popular GM, Ford, Dodge, Jeep, and Toyota trucks and SUVs.
