

New at Summit Racing Equipment: Mickey Thompson Street Comp Tires

Summit Racing now carries the latest sizes of Mickey Thompson Street Comp Tires. They provide incredible traction, crisp handling, and high speed cornering ability.

Tallmadge, OH ([PRWEB](#)) March 14, 2016 -- Summit Racing now carries the latest sizes of [Mickey Thompson Street Comp Tires](#). They provide incredible traction, crisp handling, and high speed cornering ability.

Thanks to a unique compound, asymmetric tread pattern, and more lateral grooves, Street Comp Tires deliver excellent wet or dry performance and carry the highest traction rating possible (AA) on the DOT's Uniform Tire Quality Grading system. The fact that the tires look cool is just icing on the cake.

Mickey Thompson Street Comp Tires are available in 17 through 20 inch diameters, in several section/tread widths.

Mickey Thompson donated a set of Street Comp Tires for a 1966 Ford Mustang build to benefit the United States Military Educators Association, an organization that offers educational opportunities to military veterans. Watch the Mustang come together on PowerNation TV's Detroit Muscle. The finished car was also showcased at last year's SEMA trade show. [Watch the full episode](#).
