

GPSTrackIt.com Launches The Ultimate Fleet Truck Routing Integration

GPSTrackIt's Advanced Truck Routing is the pinnacle of fleet truck routing and mapping integration. This robust routing engine gives you the ability to generate routes that will ensure accurate routing and safety for your trucks and commercial vehicles.

([PRWEB](#)) March 15, 2016 -- Fleet managers can generate complex routes with numerous vehicles and route options. They can easily customize the routes with area and road exclusions or inclusions. Plus, with a myriad of report types fleet management can quickly analyze the routes for peak efficiency.

“GPSTrackIt's advanced truck routing has over 6.7 million miles of North American roadways, plus, the most comprehensive set of commercial truck restrictions in North America, as well as over 100 million North American addresses! These are just a few of the features that make us at GPSTrackit so excited about bringing this state of the art launch to our truck and commercial clients,” states Eddie Bermudez, GPSTrackIt.com's Product Development Manager.

Key Features:

- ~Quick and easy adaptation
- ~Unlimited option profiles
- ~Smart routing direction
- ~Hazmat approved routes
- ~Playback options for directions and vehicle trails
- ~Route highlighting with color labels
- ~Overlay routing, geocode points and traffic as separate controllable layers
- ~ETA/ETD
- ~Route specific report options
- ~Integration with GPSTrackIt's – FSM Driver Android Application

The system's comprehensive data includes bridge heights and clearances, load limits, weight limits and allowances, one-way road designations, left-hand and dangerous turn restrictions, urban road classifications, as well as hazmat, truck-specific toll costs, truck-restricted, truck-designated and truck-prohibited roads. Plus many more state of the art navigation and map data features.
