

BUG SHELL Invented by InventHelp Client (NAV-884)

A leading invention firm, InventHelp is submitting the BUG SHELL to applicable companies for their review and possible feedback.

PITTSBURGH, PA ([PRWEB](#)) April 20, 2016 -- An inventor, from Lebanon, Tenn., thought there needed to be an easier way to clean the front end of a recreational vehicle or boat, so he invented the BUG SHELL.

The BUG SHELL provides an effective way to protect and clean the front of an RV, boat or vehicle. In doing so, it eliminates the need to scrape and scrub stubborn debris. As a result, it saves time and effort and it helps to preserve the finish and appearance of a vehicle's front end. The invention features a lightweight design that is convenient and easy to use so it is ideal for the owners of recreational vehicles and boats. Additionally, the BUG SHELL is producible in design variations.

"My design greatly reduces the need for tedious scrubbing and scraping of bugs and other debris from a car, RV, boat, etc., thereby greatly reducing the cleaning time," the inventor said. "It also helps maintain a brilliant finish on your car, boat, RV, etc. The short story is: enjoy your trip without dreading the cleanup."

The original design was submitted to the Nashville office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-NAV-884, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
