

InventHelp Inventor Develops Marker for Vehicles in a Funeral Procession (MTN-2034)

InventHelp, an inventor service firm, is submitting the FUNERAL GUIDE to companies for their consideration and potential feedback.

PITTSBURGH, PA ([PRWEB](#)) December 15, 2015 -- "When a funeral procession goes through an intersection, other motorists may not know how to proceed because they cannot determine how many vehicles are in the procession," said an inventor from Brooklyn, N.Y. "I came up with this as a better way to mark the vehicles."

He developed the FUNERAL GUIDE to easily mark the vehicles in a funeral procession. The unit ensures that other motorists can clearly see how many vehicles are in the procession. This helps reduce the incidence of accidents, which is designed to enhance roadway safety. It also lessens road rage. Furthermore, the device attaches to any vehicle and will not scratch or damage paint.

The original design was submitted to the Manhattan office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-MTN-2034, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
