

InventHelp Inventor Designs Easier Way to Pay Parking Fees (MTN-2406)

InventHelp, founded in 1984, is submitting the TRIPLE P'S to companies for their review and potential feedback.

PITTSBURGH, PA ([PRWEB](#)) December 15, 2015 -- Paying for parking can be a frustrating hassle, especially if meters are broken or one has to fill their pockets with coins in preparation for payment. "This is why I designed a better way to pay parking fees and for meter readers to determine who has paid and who hasn't," said an inventor from Passaic, N.Y.

The patent-pending TRIPLE P'S is a device that makes paying for parking a worry-free experience. It avoids hassle and frustration, as well as eliminates the need to deal with broken meters or a pocketful of change. It also makes meter readers' jobs easier. In addition, the device is easy to use and it can be produced in design variations.

The original design was submitted to the Manhattan office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-MTN-2406, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
