

InventHelp Inventor Develops System to Keep Trailer Lights Operational (CCT-2009)

The LOST LIGHT ALERT is being submitted to companies by InventHelp, a leading inventor service company.

PITTSBURGH, PA ([PRWEB](#)) March 31, 2016 -- "Many truck drivers do not know if the light cord separates from the trailer while driving until it is too late," said an inventor from Independence, Ky. "To make drivers aware of this potentially dangerous predicament, I devised this safety system."

He developed the LOST LIGHT ALERT to alert the driver instantly if the light cord disconnects from the trailer while traveling. This makes it possible for the driver to rectify the situation immediately. The system ensures that the running lights, turn signals and brake lights are operating properly, which reduces the risk of collisions in order to enhance roadway safety. The invention also helps the driver avoid costly citations for driving without trailer lights. Furthermore, it offers added peace of mind.

The original design was submitted to the Cincinnati office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-CCT-2009, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
