

InventHelp Device Keeps Windshields Insect-Free (NAV-891)

InventHelp, a leading invention firm, is submitting the ADVANCED WINDSHIELD WIPER SYSTEM to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) April 20, 2016 -- "We drive trucks and operate heavy machinery, and we haven't downtime to waste cleaning insects off of windshields," said one of two inventors from Harrison, Tenn. The ADVANCED WINDSHIELD WIPER SYSTEM solves this problem.

This system provides a quick, efficient way to clean insects from a windshield. It eliminates the need for manual cleaning, which saves time and effort. It also ensures better visibility. Easy to use and producible in design variations, it's ideal for commercial-truck companies. It can be made in versions for use with any vehicle fitted with a windshield, including RVs, trains, tractors and combine harvesters.

The original design was submitted to the Nashville office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-NAV-891, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
