

Hennen Motorsports Top Fuel Dragster Debuts in Houston with New ROAD RAGE Fuel Booster™ Sponsor

ROAD RAGE Fuel Booster is making its NHRA debut on the Hennen Motorsports Top Fuel Dragster at the 29th Annual Spring Nationals at Royal Purple Raceway in Houston, Texas, Friday, April 29. With serious swagger and a devil-may-care approach to its language, ROAD RAGE Fuel Booster intends to hit the market like a hurricane breaking shore – and to leave a trail of wreckage in regards to the competition.

St. Louis Missouri ([PRWEB](#)) April 20, 2016 -- St. Louis, MO – ROAD RAGE Fuel Booster is making its NHRA debut on the Hennen Motorsports Top Fuel Dragster at the 29th Annual Spring Nationals at Royal Purple Raceway in Houston, Texas, Friday, April 29. With serious swagger and a devil-may-care approach to its language, ROAD RAGE Fuel Booster intends to hit the market like a hurricane breaking shore – and to leave a trail of wreckage in regards to the competition. “We didn’t come here to take second place; that’s the first loser. We came here to kick ass, take names and win trophies,” says Charles Smith, President of ROAD RAGE Fuel Booster.

“We are excited about this new partnership with ROAD RAGE Fuel Booster and see it as a great fit for our team,” says Roger Hennen, owner of Hennen Motorsports. “The attitude, confidence and aggressiveness of their brand are characteristics that are perfectly aligned with top-level drag racing, and I’m confident fans will feed off its energy.”

ROAD RAGE Fuel Booster is a virtual shot of adrenaline for gas and diesel engines. Using proprietary nano-catalyst technology, ROAD RAGE Fuel Booster simultaneously produces higher horsepower and increased fuel efficiency. It accomplishes this by lowering the ignition point of the fuel in the system, allowing each cylinder to fire faster and more energy to be released with every stroke of the pistons.

Choosing to debut this product to the drag racing community with the sponsorship of a Top Fuel Dragster is the first of many exciting and aggressive moves this new company will be making. ROAD RAGE Fuel Booster is set to make its US Market debut in late summer 2016. It will be available in both 2.5 ounce “burst bottles” for passenger vehicles and 12 ounce “juice jugs” for over-the-road and agricultural applications. ROAD RAGE Fuel Booster performs equally well in both gasoline and diesel fuel systems. Look for ROAD RAGE Fuel Booster products wherever other high-quality engine performance enhancement products are sold.
