

ACBM Solutions Achieves Oracle Validated Integration with Oracle's JD Edwards EnterpriseOne

ACBM Solutions' validated integration delivers real-time fleet management and telematics data to Oracle's JD Edwards using the JD Edwards EnterpriseOne Internet of Things (IoT) Orchestrator.

Berkeley Heights, NJ ([PRWEB](#)) March 29, 2016 -- ACBM Solutions, a Gold level member of Oracle PartnerNetwork (OPN), today announced that it has achieved Oracle Validated Integration of its Enterprise Application Integration Version 5.5 with Oracle's JD Edwards EnterpriseOne Release 9.2.

To achieve Oracle Validated Integration, Oracle partners are required to meet a stringent set of requirements that are based on the needs and priorities of the customers. ACBM Solutions integrates with JD Edwards EnterpriseOne Capital Asset Management to deliver vehicle and equipment data for:

- Meter Readings (Odometer, Engine Hours, Fuel Usage, etc.)
- Condition-Based Maintenance (Crash Detection, Check Engine Lights, Speed Monitoring, etc.)
- Equipment Location

"Customers are now able to leverage real-time vehicle and equipment data to realize the full potential of their preventative and condition-based maintenance investment," said Larry Furino, founder at ACBM Solutions. "This is a true Internet of Things (IoT) solution that can be implemented expeditiously to improve data quality and reduce total cost of ownership from day one."

"Achieving Oracle Validated Integration gives our customers confidence that the integration between ACBM Solutions Enterprise Application Integration Version 5.5 and Oracle's JD Edwards EnterpriseOne Release 9.2 is functionally sound and performs as tested," said Kevin O'Brien, Senior Director, ISV and SaaS Strategy, Oracle. "For solutions deployed on-premise, in the cloud, or both, Oracle Validated Integration applies a rigorous technical review and test process that helps to reduce deployment risk and improves the user experience of the partner's integrated offering."

ACBM Solutions LLC provides customers with user-friendly solutions to manage and track fleets of vehicles and construction equipment. A small plug-in device installed in the customer's vehicles automatically transmits data to our servers over cellular networks. For typical automobile and light truck fleets, a small OBD2 plug-in device can be used. For heavy construction equipment, a more rugged J1939 device is available.

About ACBM Solutions

ACBM Solutions helps Oracle's JD Edwards customers leverage their investment in Capital Asset Management by automating the real-time retrieval of critical asset data. This helps customers improve data quality by streamlining the manual and error-prone tasks associated with data entry. Costs are reduced by using location tracking for vehicle recovery and monitoring driver compliance to lower insurance premiums. In addition, asset information can be used to generate equipment time entry for hourly billing.

ACBM Solutions was started in 2014 after Founder Larry Furino discovered the plethora of information already available within vehicle computer systems. Since then, ACBM Solutions has seen steady growth from their recent start. For more information, visit <http://acbmsolutions.com>.

About Oracle Validated Integration

Oracle Validated Integration, available through the Oracle PartnerNetwork (OPN), gives customers confidence that the integration of complementary partner software products with Oracle Applications and specific Oracle Fusion Middleware solutions have been validated, and the products work together as designed. This can help customers reduce risk, improve system implementation cycles, and provide for smoother upgrades and simpler maintenance. Oracle Validated Integration applies a rigorous technical process to review partner integrations. Partners who have successfully completed the program are authorized to use the “Oracle Validated Integration” logo. For more information, visit Oracle.com at <http://www.oracle.com/us/partnerships/solutions/index.html>.

About Oracle PartnerNetwork

Oracle PartnerNetwork (OPN) is Oracle's partner program that provides partners with a differentiated advantage to develop, sell, and implement Oracle solutions. OPN offers resources to train and support specialized knowledge of Oracle's products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base, and business opportunity. Key to the latest enhancements to OPN is the ability for partners to be recognized and rewarded for their investment in Oracle Cloud. Partners engaging with Oracle will be able to differentiate their Oracle Cloud expertise and success with customers through the OPN Cloud program – an innovative program that complements existing OPN program levels with tiers of recognition and progressive benefits for partners working with Oracle Cloud. For more information, visit <http://www.oracle.com/partners>.
