

Waste Tote Holder Invented for Travel Trailers - Designed by InventHelp Clients (BGF-994)

InventHelp is working to submit this idea, the RV WASTE TANK BUDDY, to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) March 30, 2016 -- Since RVs are appropriately named for the recreational benefits they provide, anything that can ease their use will add to the leisure time of their owners and users. That's exactly what two inventors from Newark, Ohio, had in mind when they figured out how to make the necessary handling of the vehicle's waste tank a much easier task.

They developed patent-pending RV WASTE TANK BUDDY to provide a conveniently located carrier for standard plastic RV waste tanks. As such, it eliminates the need to store waste tanks inside the RV or strapped to a ladder on the outside. What's more, it frees up space inside the trailer. Along with that, it helps maintain sanitary conditions. At the same time, it is sturdy enough to withstand continued wear and tear. It is also effective and easy to install and use. In addition, its simple design minimizes production costs.

The inventors' personal experience inspired the idea. "As RV owners, we were dissatisfied with both the interior and exterior storage options for the vehicle's portable waste tank," one of them said. "We wanted to find a better way to carry it and have it accessible."

The original design was submitted to the Bingham Farms office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers.
