

## **InventHelp Inventor Develops Accessory for Covered Truck Beds (HTM-1090)**

*InventHelp, a leading invention company, is submitting AN EXTENSION to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) April 04, 2016 -- "I have a cover on the bed of my pickup truck, which is great for protecting the contents from inclement weather, but it does make it difficult to get to items in the rear of the bed," said an inventor from Princeton, Ind. "I designed this so that I could load and unload the bed easily with the cover on."

He created a prototype for AN EXTENSION to allow a covered truck bed to be loaded and unloaded efficiently. The unit eliminates the need to crawl beneath the cover to access items stored at the back of the bed. It saves time and effort. The device provides easy access to cargo in a covered bed. Furthermore, it is adaptable for use with new and existing trucks. The idea is patent pending.

The original design was submitted to the Houston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-HTM-1090, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
