

InventHelp Inventors Design a Storm-Proof House System (KPD-306)

Pennsylvania-based InventHelp is submitting the EMERGENCY HOUSE SHELTER WITH CARS to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) April 04, 2016 -- Besides the threat to lives, extreme storms also damage or destroy homes, which only compounds such tragedies. This gave two inventors from Wilmington, Del., the idea for a way to save both lives and homes when dangerous weather strikes.

The EMERGENCY HOUSE SHELTER WITH CARS is a system that provides effective recourse in the event of a severe storm. It helps save both lives and property, as well as ensures that there is still a place in which to live after the storm has passed. Overall, it promotes safety and peace of mind. Easy to use and reliable, the system is compatible with all homes and mobile homes. Also, it protects pets and vehicles.

The original design was submitted to the King of Prussia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-KPD-306, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
