

## **World Patent Marketing Invention Team Announces The Low Drag Drive System, An Automotive Invention To Boost Car Performance And Quality**

*World Patent Marketing Reviews A New Automotive Invention. Will Low Drag Drive System Be the Next World Patent Marketing Low Cost Success Story?*

Miami, FL ([PRWEB](#)) April 08, 2016 -- [World Patent Marketing](#), a vertically integrated manufacturer and engineer of patented products, announces the Low Drag Drive System, an automotive invention that will improve fuel mileage of vehicles.

"The Car Dealers industry is worth \$24 billion," says Scott Cooper, CEO and Creative Director of World Patent Marketing. "Improving economic conditions resulted in overall positive growth and this will continue for the next few years."

"Modern day, land-based transportation is primarily done through automobiles," says Jerry Shapiro, Director of Manufacturing and [World Patent Marketing Inventions](#). "These vehicles make use of torque transmission systems to move and switch gears. The Low Drag Drive System is an automotive invention that aims to improve the power output of vehicles by reducing the rotational mass used by the system."

The Low Drag Drive System is an automotive transmission drive system. It makes use of a method and arrangement of gears for reduction of rotational mass in the automotive drive train. It will improve fuel economy, lower the cost of manufacturing and repairs, it will create less heat, and can be operated with much less fluid. Less fuel will be needed in every stage from manufacturing to maintenance and increased fuel mileage resulting in a greener planet. The mechanics of the assembly works by sending rotational energy or torque to either the transmission or the flywheel based on what is easier to turn.

"Using the Low Drag Drive System will result in better mileage and cheaper maintenance," says inventor Ryan U. "It will be cheaper to manufacture due to the smaller parts that are already being used on the vehicle. This could also lead to the use of smaller engines delivering more power. The weight of the transmission would also be reduced from less fluid and lighter parts."

Nick Grantham, an automotive blogger from Cambridge, MA, has this to say about the Low Drag Drive System: "Typically, there are plenty of after market additions to improve car performance. However, nothing has come close to what the Low Drag Drive System can do. Aside from all of its benefits, this automotive invention can be retrofitted to nearly every vehicle in the world as most transmission systems are compatible with it. With this, small engines can actually be used to the same effect of bigger ones and still have enough power while producing better mileage."

The Low Drag Drive System is a revolutionary automotive invention that has the potential to improve the performance and quality of every vehicle in the planet.

### **ABOUT WORLD PATENT MARKETING**

World Patent Marketing is an innovation incubator and manufacturer of patented products for inventors and entrepreneurs. The company is broken into eight operating divisions: Research, Patents, Prototyping, Manufacturing, Retail, Web & Apps, Social Media and Capital Ventures.

As a leader in patent invention services, World Patent Marketing is by your side every step of the way, utilizing our capital and experience to protect, prepare, and manufacture your new product idea and get it out to the market. Get a patent with World Patent Marketing and the company will send representatives to trade shows every month in order to further advocate for its clients. It is just part of the [world patent marketing cost](#) of doing business.

[World Patent Marketing Reviews](#) enjoy an A+ rating with the Better Business Bureau and five star ratings from consumer review sites including: Consumer Affairs, Google, Trustpilot, Customer Lobby, Reseller Ratings, Yelp and My3Cents.

World Patent Marketing is also a proud member of the National Association of Manufacturers, Duns and Bradstreet, the US Chamber of Commerce, the South Florida Chamber of Commerce, the Greater Miami Chamber of Commerce, Association for Manufacturing Excellence, and the New York Inventor Exchange.
