

## **PaceSetter Automotive Software Integrates with Shift Mobility**

*Blue Sage Software, Inc., a leading software provider to the automotive aftermarket, announces the integration of its PaceSetter™ ERP system with SHIFTMobility's suite of mobile applications to increase the accessibility of PaceSetter automotive software on mobile devices.*

San Diego, CA ([PRWEB](#)) April 05, 2016 -- Blue Sage Software, Inc., a leading software provider to the automotive aftermarket, today announced the integration of its PaceSetter™ ERP system with SHIFTMobility's suite of mobile applications. Built on over 35 years of operating automotive aftermarket businesses worldwide, PaceSetter is a full functioned ERP system focused on business automation. Supporting millions of parts, thousands of pricing models, and electronic interfaces to all major aftermarket buying groups, PaceSetter has proven its durability and reliability over and over for 35+ years. Built from the ground up to work seamlessly in multi-store, multi-warehouse implementations.

SHIFTMobility's mobile platform enables automotive professionals to operate their businesses from mobile devices such as Smartphones and Tablets anywhere at any time. SHIFTMobility's All-In-One mobile platform includes ShopLite for repair shops, SupplierPro for distributors and VroomBox for manufacturers. Deployed to over a thousand repair shops it simplifies the shop activity by being easy to use, fast and intuitive.

“Integration with ShiftMobility brings true mobility to our aftermarket customers”, says Roger Moyers, President of Blue Sage Software. “Our customers depend on us to provide them with state-of-the art solutions to problems they encounter in their business. These businesses benefit from mobile application integration which simplifies the selling and delivery of products to their customers.”

With a growing customer base of automotive aftermarket businesses PaceSetter from Blue Sage Software is becoming a force in this very large, complex market. Blue Sage Software, Inc., manufactures and sells software used in the automotive aftermarket. The company is headquartered in San Diego, CA and is privately held.

### About Blue Sage Software:

Blue Sage Software's PaceSetter business management system provides solutions for inventory management, point of sale (POS), ecommerce, invoicing, accounts receivable, warehouse efficiency, and delivery tracking to keep businesses running smoothly day-in and day-out. PaceSetter is a scalable, stable & reliable platform for Warehouses, WDs, Jobbers, and Retailers. Analytical tools track and identify parts movement, sales trends and more. Unparalleled Aftermarket IT support for 30 years. [www.bluesagesoftware.com](http://www.bluesagesoftware.com)

### About SHIFTMobility

SHIFTMobility's All-In-One platform for the auto industry underpins all of its technologies and is unique in its ability to vertically integrate manufacturers, distributors, and repair centers over any mobile device – revolutionizing the way businesses collaborate and grow. Its innovative platform was designed to not only enhance and simplify communication between organizations, partners, and their customers, but to meet the challenges of the connected future and enable businesses to thrive in an era of fast change.
