

InventHelp Inventor's System Enhances Driving Safety (TOR-9459)

InventHelp, based in Pittsburgh, Pa., is submitting the TWO STAGE WARNING SYSTEM to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) April 08, 2016 -- "Due to a lot of highway driving I know the dangers of not knowing what the driver ahead of you is doing or is going to do," said a concerned inventor from Collingwood, Ontario, Canada. "In order to solve the problem I conceived of my design."

The TWO STAGE WARNING SYSTEM enhances driving safety by helping to prevent collisions on roads and highways. It allows for better reaction time by following drivers. As a result, it promotes peace of mind. This easy-to-use system is compatible with all vehicles.

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-TOR-9459, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
