

## **Now at Summit Racing Equipment: Centerforce DYAD Multi-Disc Clutch Kits**

*Summit Racing now carries Centerforce DYAD Multi-Disc Clutch Kits. Designed to handle the additional loads of a modified performance engine, the DYAD technology means the clutch can handle up to 1,300 lbs.-ft. of torque.*

Tallmadge, OH ([PRWEB](#)) April 14, 2016 -- Summit Racing now carries [Centerforce DYAD Multi-Disc Clutch Kits](#). Designed to handle the additional loads of a modified performance engine, the DYAD technology means the clutch can handle up to 1,300 lbs.-ft. of torque.

Centerforce's patented DYAD System relies on a pair of discs being driven from a single damped hub, ensuring that both discs are fully damped. This results in better drivability and improved noise reduction. The DYAD setup also has a clever anti-rattle system that uses specialized washers to suppress floater rattle without inhibiting the clutch operation. The clutch kits come pre-assembled with ARP hardware.

Installing a Centerforce DYAD Drive System Multi-Disc Clutch kit is a straightforward process, requiring no complicated setup or adjustments. Better yet, the DYAD system retains a smooth clutch engagement, quiet operation, and a soft pedal feel. It's the perfect solution for mega-power performance vehicles that are driven on the street.

Summit Racing offers Centerforce DYAD Clutch Kits for a wide range of cars and trucks, including late model Chevy Camaro, Ford Mustang, and Dodge Challenger.
