

## **ActiveLED, Inc. Introduces the CPY3 LED Parking Garage Canopy Enhancing Parking Garage Safety While Saving Energy and Maintenance Costs**

*Is Your Parking Garage a Safe Environment For Students, Employees and Patrons?*

Georgetown, Texas ([PRWEB](#)) April 14, 2016 -- ActiveLED, Inc., a Texas-based manufacturer of USA-made LED luminaires, announced today the release of the CPY3 LED Parking Garage Canopy Luminaire. This fixture addresses garage owners concerns about providing a safe and secure environment while also enjoying significant savings in both energy and maintenance costs. [Watch Video Here](#)

According to the US Department of Justice, 25% of all violent sexual crimes take place in parking garages or other public areas.<sup>1</sup>

“Parking garage lighting often plays a critical role in how safe or secure students, employees, and patrons feel,” commented Chad Randall, Director of Marketing for ActiveLED. “This can have a direct impact on your business. With the popularity of social media, people have begun to post their experiences online. I read one review where a shopper stated that she would no longer shop at a particular store because the garage was poorly lit and she didn’t feel safe. With ActiveLED parking garage lighting, garage owners no longer need to choose between lighting costs on one side - and safety, security and liability on the other.”

The ActiveLED CPY3 LED Parking Garage Canopy Luminaire is a maintenance free fixture that provides clear and consistent lighting while consuming up to 90% less energy than conventional lighting fixtures. And with a ten year, no-light-loss warranty, garage owners can feel secure in their investment while saving money on their maintenance costs. [Watch Video Here](#)

More savings are available with features such as the built-in, ActiveREST dimming technology which digitally dims the fixtures light output when no one is present. Sensors then bring lights back to full when a pedestrian or vehicle enters the space. ActiveREST also allows perimeter fixtures to be dimmed during the day when enough natural daylight is present. With ActiveLED, lighting is on only when and where it needs to be.

Many garage owners are also installing security cameras. Studies have shown that LED lighting is best suited for security cameras. ActiveLED Lighting creates less glare, better color rendering, and more light clarity and uniformity than traditional lighting sources, thereby increasing visibility and camera detection.

It’s no longer a choice. Garage owners can save on energy costs while still providing a safe and secure environment in their parking garage with ActiveLED.

The CPY3 LED Parking Garage Luminaire is currently available directly from ActiveLED or its network of Certified Dealers. For more information, call ActiveLED at 888-288-9080, or visit the company online at [www.ActiveLED.com](http://www.ActiveLED.com). Specific information on this fixture is also available [here](#).

About ActiveLED, Inc.

ActiveLED, Inc. is an innovator of solid-state technology and manufacturer of commercial and industrial LED lighting fixtures. ActiveLED is at the forefront of LED lighting technology and has revolutionized the standards of LED lighting to deliver better, cooler, longer-lasting lights that use a fraction of the Watts compared to other

fixtures. Founded in 2007, ActiveLED is headquartered in Georgetown, Texas, with offices in the United States, the United Kingdom, Japan, and Singapore.
