

## **InventHelp Invention Protects Vehicle Door Handles from Frigid Weather (HTM-1084)**

*InventHelp, founded in 1984 in Pittsburgh, is submitting the HANDLE PROTECTOR to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) April 16, 2016 -- The friend of an inventor from Morgantown, W.V., broke the handle of his car door because it was frozen. This inspired the inventor to design a way to prevent this annoying and expensive problem. He then created a prototype of his idea.

The easy-to-use and versatile HANDLE PROTECTOR prevents the door handle of a vehicle from freezing. This avoids hassle and frustration, as well as eliminates the risk of the handle snapping and breaking. Overall, it promotes peace of mind and saves money.

The original design was submitted to the Houston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-HTM-1084, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
