

## **Inventor and InventHelp Client Develops Convenient Propane-Tank Transporter (HTM-3007)**

*A leading inventor service company, InventHelp is submitting LARRY'S IDEA to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) April 18, 2016 -- "Whenever I have to transport a propane tank, it ends up rolling around in the back of the vehicle, which is not only distracting but potentially dangerous," said an inventor from Hudson, Ohio. "I came up with this idea to keep the propane tank securely stored during travel."

He developed the patent-pending LARRY'S IDEA to secure a propane tank in place during transit. The unit prevents the tank from rolling around in the midst of transport. This avoids damages to the vehicle. It also keeps the driver from being distracted. The device ensures that the propane tank is not harmed as well. In addition, the invention is designed to enhance safety and provide added peace of mind.

The original design was submitted to the Houston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-HTM-3007, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
