

InventHelp's Device Eases the Transfer of Gasoline from a Can to a Vehicle Tank (MIS-133)

This idea, REFUELING SMALL ENGINES, is being submitted to companies by InventHelp, a leading invention firm.

PITTSBURGH, PA ([PRWEB](#)) April 19, 2016 -- Many people have to supply their vehicles with fuel kept in gas cans. "Due to my age and inability to lift heavy objects, it's difficult for me to transfer gasoline from a can to a tank," said an inventor from Thorp, Wis. "My design solves this problem."

The patent-pending AIR FUEL HAND TRANSFER PUMP enables a user to transfer gasoline from a gas can to a vehicle gas tank in an easier and more ergonomic manner. This avoids strain and struggle. Easy to use, compact and producible in different sizes, the device is suitable for the general population, especially the elderly and people with physical disabilities.

The original design was submitted to the Milwaukee office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-MIS-133, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
