

Inventor and InventHelp Client Develops Monitoring System for Safety (QCY-236)

A leading invention firm, InventHelp is submitting THE ALERT to companies in the hopes of a good faith review.

PITTSBURGH, PA ([PRWEB](#)) April 22, 2016 -- "I have seen too many tragic news reports detailing the deaths of children and others who were left behind in vehicles or separated from their parents or caregivers," said an inventor from Lincolnton, N.C. "In order to prevent such dangerous separations, I developed this monitoring system."

He created a prototype for the patent-pending THE ALERT to alert a parent if a child is forgotten in a vehicle, wanders off or is accidentally left behind. It reminds the parent to retrieve the child immediately. The system also lessens the risk of kidnapping. The invention is designed to enhance safety by reducing the risk of injuries and/or deaths, which provides added peace of mind. It is usable to monitor the whereabouts of children, pets, the elderly and other at-risk individuals. Additionally, the system also can be used with personal effects, including wallets, key chains, etc.

The original design was submitted to the Charlotte office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-QCY-236, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
