

InventHelp Inventor Develops Convenient Vehicle Accessory for Parking (RIM-249)

InventHelp, based in Pittsburgh, Pa., is working to submit this idea, the VEHICLE FRONT END LOCATOR, to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) April 23, 2016 -- "I had difficulty judging where the front end of my vehicle was when I was parking in a lot or garage," said an inventor from Richmond, Vir. "I came up with this idea so that I knew exactly where the front of my vehicle was. That way, I will not run into anything accidentally."

He created a prototype for the VEHICLE FRONT END LOCATOR to make it easier to see where the front end of the vehicle is located. The accessory prevents the driver from bumping into walls, parked vehicles or other obstacles, which avoids damages to vehicles and structures. It eliminates guesswork and confusion when parking. In addition, the device is adaptable for use with any vehicle.

The original design was submitted to the Richmond office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-RIM-249, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
