

## **Spill Center Announces Transportation Hazmat Spill Blog Series**

*Spill Center's Hazmat spill blog series helps transportation companies with spill response, documentation, reporting, and nationwide cleanup contractor referrals.*

Hudson, MA ([PRWEB](#)) May 11, 2016 -- Spill Center was founded in 1990 on the premise that no company will ever have enough spills to get good at managing them efficiently and cost-effectively. Spill Center deals with environmental releases every day on behalf of many companies, including transportation organizations.

By managing spills in jurisdictions throughout the country, Spill Center has developed highly efficient systems for spill response, documentation and reporting as well as nationwide cleanup contractor referrals and disposal resources. This transportation hazmat blog series will prove valuable to any company which has care, custody and control of materials which could result in a spill.

Here are a few samples of transportation blogs in the series:

- [Who's Liable for the Spill if Our Driver Isn't at Fault?](#)
- Four Things You Don't Know About Spills
- Is Your Company Prepared for a \$15,000 Fuel Spill?
- Chemical Spills: Don't Be Caught Unprepared
- Trucking Reputation Management through Spill Preparedness Measures

Spill Center is a nationwide, 24-hour emergency resource dedicated to reducing environmental liability for companies that become spill generators. With a single call or visit to the Spill Center website, <http://www.spillcenter.com> spill generators can tap into Spill Center's expertise at finding qualified cleanup contractors, completing required regulatory reporting and thoroughly documenting spill events.

The company's expertise in spill management and environmental claims handling has helped hundreds of clients in the transportation, chemical and insurance industries. They count on Spill Center to help get past spill incidents and avoid fines and penalties for non-compliance with reporting regulations.
