

GreenRoad Enhances Market Leading Mobile Fleet Performance Management Software with Added Capabilities and Improved Performance

The New Release Puts Emphasis on Hours of Service, Usability and Improved Performance and Reporting

Austin, TX ([PRWEB](#)) May 11, 2016 -- [GreenRoad Technologies](#), a global leader in driver safety and fleet performance management solutions, is proud to announce the next release of its mobile-based Driver Behavior and Fleet Performance Management solution. Consistent with its commitment to serving the industry through driver behavior and fleet performance management solutions and expertise, GreenRoad is equipping and aligning fleet and mobile workforce professionals across the world with a comprehensive performance management solution that spans driver to vehicle and beyond to the back office.

GreenRoad's new mobile release encompasses a configurable, mobile based platform for implementing a comprehensive driver behavior and fleet management program, protocols, processes and policies as well as access to GreenRoad's experts who have extensive fleet management, risk and compliance experience.

Additionally, the latest release is accompanied by a mobile based [Hour of Service solution](#) that allows organizations and drivers to electronically manage their driver logs for full FMCSA compliance by setting work flow and controls for tracking driver hours and any possible violations.

- ECM connectivity enables automatic, time-stamped logging of vehicle mileage and engine hours.
- Real-time alerts for drivers of actual and impending violations
- Complete roadside inspection readiness – approve, view or send logs from the cab
- Comprehensive dashboard and reporting
- Exception-based management - see fleet status at a glance and focus on drivers that need your attention

“With the launch of our Hours of Service solution, GreenRoad has an opportunity to make a huge impact for our customers with our compliance-driven SaaS solution. After listening to our customers and performing extensive market research, GreenRoad is confident our experts and Hours of Service software will enable organizations to proactively manage hours of service logs and mitigate risks throughout their fleets and mobile workforce,” says Roni Ravi, chief technology officer of GreenRoad.

Jacobs is one of the world's largest and most diverse providers of technical, professional and construction services. In 2013 Jacobs' Buildings and Infrastructure group launched a safety initiative designed to reduce road accidents. As part of that, Jacobs selected the GreenRoad Mobile solution as the basis of a driver behavior monitoring system.

The GreenRoad flexible solution can be deployed on either a mobile phone or tablet, eliminating the need to take company vehicles off the road for equipment to be fitted, or for permission to be sought from rental companies for fitting equipment in their vehicles.

On June 2, 2016, GreenRoad will host a free webinar with more information about GreenRoad Mobile and Hours of Service. Join our experts as they share how the mobile-based fleet management solution helps mitigate compliance risks and create a better performing fleets.
