

Fuel Card Services Joins Forces with CLOCS

Here at Fuel Card Services, we're happy to be showcasing our new strategic partnership with Construction Logistics and Cyclist Safety (CLOCS).

(PRWEB UK) 11 May 2016 -- Bringing together members of the construction logistics industry with all manner of road users across the UK, CLOCS operates to ensure the successful management of work-related road risk and helps to embed a culture of responsibility within all its members.

By focusing on limiting the risk to all travellers who share the roads with the UK's many construction vehicles, CLOCS helps to save lives and, here at Fuel Card Services, we're proud to be partnering with this inspirational organisation.

As such, CLOCS members can save up to 10p per litre when signing up for a fuel card account with us, while monthly fees for cardholders (which normally stand at £12 per year) are being waived.

Indeed, a range of exclusive cost saving offers are available for current CLOCS businesses across the UK, as well as those that are currently working towards full accreditation, with our extensive network of sites up and down the country just one reason to sign up today.

Find out more about the great deals on offer and the full range of services for CLOCS companies when working with Fuel Card Services by [heading here](#).
