

Vehicle Inspection Systems to Display Squirrel: Wheel Safety Device at 2016 Waste Expo

Vehicle Inspection Systems will be exhibiting at the 2016 Waste Expo in Las Vegas, NV from June 7-9. The sales team will be displaying the Squirrel: Wheel Safety Device at booth #5414 in the Las Vegas Convention Center throughout the three day span of the show.

([PRWEB](#)) May 26, 2016 -- The Vehicle Inspections Systems' sales team will be exhibiting at the 2016 Waste Expo in Las Vegas, NV from June 7-9. This is the company's second year exhibiting at the Expo and we will be displaying the Squirrel: Wheel Safety Device and the VIS-Shine Portable Wheel Polishing Machine. VIS will be located at booth #5414 in the exhibit hall of the Las Vegas Convention Center.

The Squirrel is a uniquely designed wheel safety device that secures lug nuts in place to prevent them from loosening, spinning, and potentially coming off the wheel. Wheel loss situations are much more prevalent than people think; by applying a direct force against the side of the wheel nut, it prevents any vibrations from loosening the lug nuts keep the vehicle protected while the wheel is both moving and stationary.

Mark Keegans, Vice President of VIS, said, "Based on the success and feedback of the Squirrel at last year's expo, we are very excited for the opportunity to exhibit again this year. The waste and recycling transportation industry has been a new market to us in the last couple of years, and we have found great acceptance for more efficient wheel safety tools and practices such as the Squirrel. When we exhibit the Squirrel at industry trade shows and events, we are putting an emphasis on the seven plus years of proven success of the Squirrel's wheel safety benefits and features."

Stop by booth #5414 at the 2016 Waste Expo held at the Las Vegas Convention Center to see how simple and effective the Squirrel is when applied. For more information on the Squirrel: Wheel Safety Device before the show, visit www.vischeck.net/the-squirrel.
