Columbiana, Ohio ([PRWEB](#)) June 25, 2016 -- Prominent provider of aftermarket Jeep parts and Jeep accessories, [4WD](#), is now carrying [Weigh-Safe](#) hitches for Jeeps. The aluminum adjustable ball mounts are specifically used for monitoring tongue weight and are made for all Class 3-5 applications for standard hauling. Taking the guesswork out of trailer towing makes these Jeep hitches safe, efficient and necessary.

The Weigh Safe Drop Hitch has a built in scale to ensure a vehicle is properly balanced and safe to tow and has different applications for Jeeps. “Weigh-Safe hitches are designed for safety-conscious Jeep owners with premium needs,” says Brandon Doman, President of Weigh-Safe/LEAP Innovations. “We also have a new tongue weighing tow ball that is designed to be more universal across the board for all towing customers.”

To prevent trailer sway, guidelines state that correct towing tongue weight should be no less than 10% of gross trailer weight (GTW) and no more than 15%. For example, tongue weight for a Jeep Wrangler towing a 2,000 lb. trailer should be no less than 200 lbs. and no more than 350 lbs.

Whether towing a boat in the spring or hauling firewood in the fall, a Weigh-Safe hitch is a must-have for Jeeps and is especially useful for diesels. The hitch is easy to operate by setting the tongue weight with a dial and it increases drivability and prevents wag.

“We use Weigh-Safe hitches on all of our 4WD tow vehicles to ensure safe transportation and protect our investment in rigs we put a lot of time, effort and money into,” says 4WD General Manager Sean Campbell. “Weigh-Safe helps us to know that a vehicle is loaded correctly and helps us get to events on time and safely along with the human cargo we’re carrying.”

The Weigh-Safe drop hitch has applications for individual Jeep drivers and for businesses with vehicle fleets that rely on safe towing. The partnership between Weigh-Safe and 4WD is a great fit for both companies who cater to Jeep enthusiasts with essential products.

About 4Wheel Drive Hardware: 4Wheel Drive Hardware is the leading industry provider of Jeep parts and accessories, with a passion for serving the needs of the off-road community and industry.
