Austin, Texas Amerisale inc. releases DynaPic for Windows to the automotive industry at NADA in New Orleans 2002

New Software for auto dealers (DynaPic for Windows) changing the rules and upsetting the competition.

Austin, Texas March 31, 2002. An Austin based development company (PRWEB) March 20, 2002

DynaPic for Windows at the NADA in New Orleans in January. Market research indicates

that this new technology will change the way Auto Dealerships use the Internet and

manage their inventory. DynaPic is a sales oriented system that allows IT mangers to

create real time commerce, generating more leads and costing less than conventional

methods to produce. This easy to use software does brings a complete solution to

dealerships that have had to use multiple vendors to get similar services in the past.

DynaPic for Windows takes dealership Internet marketing and inventory management to a

new level. From window sticker and warranties to reports and web site management on

demand. This robust program empowers dealerships to succeed on the net. Many early

comers claim not only lower cost but double even triple sales in the first 60 days.
