

D&D Instruments Introduces New Remanufactured Instrument Cluster Program

D&D Instruments (DDI) is proud to announce the availability of remanufactured instrument clusters for Thomas Built Buses and Freightliner trucks produced after 2002. This new program builds on an existing repair and return program for all makes of buses and heavy-duty vehicles.

Minneapolis, Minnesota ([PRWEB](#)) June 20, 2016 -- D&D Instruments (DDI) is proud to announce the availability of remanufactured instrument clusters for Thomas Built Buses and Freightliner trucks produced after 2002. This new program builds on an existing repair and return program for all makes of buses and heavy-duty vehicles.

DDI General Manager, Geoff Selby, says, “We are very excited about this new program and the value it will bring to our current and future customers.” The money saving proposition of a remanufacturing program is very attractive to private and public fleets, as well as dealerships and repair facilities.

A remanufactured instrument cluster provides cost savings of up to 50 percent over buying new. With free same-day shipping, DDI keeps its customers’ vehicles where they belong—on the road. Key details:

- Significant cost savings over buying new;
- Proven record of product quality and dependability;
- Reliable and trustworthy company has been in business for over 20 years.

About D&D Instruments

DDI remanufactures instrument clusters for International and IC Bus vehicles produced from 1992 - present and Thomas Built Buses and Freightliner trucks produced after 2002. The company also repairs instrument clusters for most other makes and models of medium and heavy-duty vehicles, vocational vehicles and buses.
