

## **New at Summit Racing Equipment: Body Armor 4x4 PRO-Series Bumpers for Jeep Wrangler and Ram HD Trucks**

*Summit Racing now carries Body Armor 4x4 PRO-Series Bumpers for Jeep Wrangler JK and RAM 2500 and 3500 series heavy duty trucks. The fabricated steel bumpers provide excellent front end protection plus the ability to handle heavy-duty winches.*

Tallmadge, OH ([PRWEB](#)) June 21, 2016 -- Summit Racing now carries [Body Armor 4x4 PRO-Series Bumpers](#) for Jeep Wrangler JK and RAM 2500 and 3500 series heavy duty trucks. The fabricated steel bumpers provide excellent front end protection plus the ability to handle heavy-duty winches.

### Front Bumper for 2007-16 Jeep Wrangler

The PRO-Series front bumper is a frame-wide 'stubby style' with bolt-on wings that have openings for square LED lights. A large belly pan extends down and below the run-under bar for added protection. The bumper can support winches rated up to 12,500 pounds pull capacity. Other features include a gusseted stinger bar, an opening for a 20 inch long dual LED light bar, welded end plates and recovery points, and a textured black powdercoat finish. The bumper installs with no cutting, welding, or drilling required.

### Bumpers for 2010-15 Ram 2500/3500

This PRO-Series front bumper features a front skid plate that wraps under the intercooler for maximum protection. The plate has slots to maximize the airflow to the intercooler. A full size grille guard protects the grille, hood, and headlamp areas. It bolts to the bumper deck, giving the vehicle owner the option of using the guard or leaving it off. Other features include:

- Fully welded steel construction
- Supports winches up to 16,500 pounds pull capacity
- Four 4.5 inch light mounting points
- Openings for factory auxiliary lights
- Bolt-on installation—no cutting or welding
- Textured black powdercoat finish

Summit Racing also has a matching PRO-Series rear bumper for the Ram. Made from 3/16 inch thick steel plate, it has two welded recovery points and dual light mounting points inside of the bumper with laser cut protective screens. It will accommodate the factory hitch and has mounting provisions for the factory backup sensors.
